1 recall listed by Transport Canada for this model year

Airbag

2015481 16 Oct 2015

On certain vehicles, front seat-mounted side impact airbag modules may contain a defect which, in the event of an airbag deployment, can cause airbag inflator components to separate and be propelled into the interior compartment, possibly striking occupants. It is also possible that the airbag may inflate only partially, or not at all, in the event of a crash. If the airbag components separate and are propelled into the interior compartment during deployment in a crash, or the airbag does not inflate, there may be an increased risk of injury to vehicle occupants.

Correction: Dealers will replace affected side airbag modules.
