5 recalls listed by Transport Canada for this model year

Brakes 2014380 9 Sep 2014

Certain vehicles fail to comply with the requirements of Canada Motor Vehicle Safety Standard 135 - Brake Systems. The electronic parking brake may not fully release, which could cause the brakes to drag. In this condition, the parking brake indicator also may not illuminate even though the parking brake is engaged, contrary to the requirements of the standard. Brake drag could affect vehicle acceleration and cause undesired deceleration, excessive brake heat, and premature wear to some brake components. If the brake drag is significant or if the vehicle is operated for an extended period of time in this condition, there is a potential for the rear brakes to generate significant heat, smoke and sparks. Correction: Dealers will update the electronic parking brake software.

Electrical 2014082 18 Mar 2014

On certain vehicles, a buildup of pressure in the brake booster pump wiring harness could dislodge sealing plugs from an electrical connector and allow contaminants to enter the brake booster pump relay connector. This could result in corrosion and cause a short in the connector, potentially resulting in a fire and increasing the risk of injury and/or damage to property. Correction: Dealers will affect repairs.

Lights and instruments 2013356 16 Oct 2013

On certain vehicles, the brake lamps could flash intermittently without the brake pedal being depressed. This would convey a confusing message to following road users who, in turn, may not react in a timely manner when the driver does apply the brakes. As such, this could result in a crash causing property damage and/or personal injury. Correction: Dealers will reprogram the Body Control Module. Note: This recall supersedes 2013-176.

Lights and instruments

2013176 24 May 2013

On certain vehicles, the brake lamps could flash intermittently without the brake pedal being depressed. This would convey a confusing message to following road users who, in turn, may not react in a timely manner when the driver does apply the brakes. As such, this could result in a crash causing property damage and/or personal injury. Correction: Dealers will reprogram the Body Control Module.

Seats and restraints

2012367 29 Oct 2012

On certain vehicles, the rear seat headrest mechanisms may not lock in the upright position after the headrests are folded. Failure of the headrests to remain in the upright position could increase the seat occupant's risk of personal injury during a crash. Correction: Dealers will inspect and, if necessary, replace the rear seat headrest assemblies.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
