4 recalls listed by Transport Canada for this model year

Seats and restraints

2026251 21 May 2026

Issue: On certain vehicles, the weight sensor for the front passenger seat may not have been manufactured properly. As a result, the passenger-front airbag and knee airbag could deploy in a crash that doesn't require them to. Note: This recall is an expansion of Transport Canada recall no. 2024-059. If the weight sensor fails, the SRS warning light would turn on in the instrument panel. Safety Risk: An airbag system that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to replace the passenger-front seat weight sensor.

Seats and restraints

2023127 9 Mar 2023

Issue: On certain vehicles, the seat belt buckles for the driver and front-passenger seats could wear over time and may not latch securely. If this happens, the seat belt could unlatch unexpectedly. Safety Risk: A seat belt that doesn't latch securely could create an increased risk of injury in a crash. Corrective Actions: Honda will notify owners by mail and instruct you to take your vehicle to a dealership to inspect the driver and front-passenger seat belt assemblies. In most cases, the seat belt buckle release buttons will be replaced. If the dealer determines that a buckle can't be repaired, it will be replaced with a new part.

Steering

2018536 27 Sep 2018

On certain vehicles, the electric power steering system could get caught in an infinite loop of steering assist going from lock to lock due to a manufacturing defect in the torque sensor. This could cause unintended steering input, reducing vehicle manoeuvrability, which could result in a crash causing injury and/or damage to property. Correction: Dealers will replace the steering gearbox assembly.

Fuel system

2017347 14 Jul 2017

On certain vehicles, the fuel feed pipe may not have been properly manufactured. Upon the fuel lines being pressurized, the connection between the feed pipe and fuel hose could separate, resulting in a fuel leak which could cause an engine stall. Additionally, a fuel leak in the presence of an ignition source could increase the risk of fire causing injury and/or damage to property. Correction: Dealers will replace the fuel feed pipe and associated single use retainers.

Listed for the model year, not checked against your VIN. Honda confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
