1 recall listed by Transport Canada for this model year

Fuel system

2012060 16 Feb 2012

On certain vehicles, the vent shut-float valve case (a component of the on-board vapour recovery system located inside the fuel tank) may have been incorrectly manufactured and could fail. This could allow fuel leakage from the tank which, in the presence of an ignition source, could result in a fire causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace the fuel tank assembly.

Listed for the model year, not checked against your VIN. Acura confirms which apply.
