1 recall listed by Transport Canada for this model year

Airbag

2023684 20 Dec 2023

Issue: On certain vehicles, a sensor for the occupant classification system (OCS) may not have been manufactured properly. As a result, the sensor could short circuit and cause the airbag system to turn off the passenger-front airbag even when a passenger is seated. Note: This problem would cause a warning message to display on the instrument panel and the airbag indicator light would display "passenger airbag off".

Safety Risk: An airbag that is turned off could increase the risk of injury to a passenger in a crash. Corrective Actions: Toyota will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the OCS sensor.

Listed for the model year, not checked against your VIN. Toyota confirms which apply.
