3 recalls listed by Transport Canada for this model year

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Powertrain 2016217 12 May 2016

On certain vehicles equipped with a manual transmission, clutch diaphragm springs may crack or become damaged, which could result in the driver being unable to shift gears, or potentially result in a loss of motive power. Depending on traffic conditions and the driver's reactions, these issues could increase the risk of a crash. Correction: Dealers will install a pedal travel limiter and pedal switch.

Lights and instruments 2015578 4 Dec 2015

Fiat Chrysler Automobiles (FCA) Canada is conducting a voluntary Customer Satisfaction Notification Program involving certain vehicles equipped with automatic transmissions. Fiat Chrysler Automobiles (FCA) will update the Powertrain Control Module software to improve activation timing of the backup lamps. This updated software will turn the backup lamps on earlier, indicating to other road users that the driver has selected reverse gear. This action is not being conducted under the requirements of the Motor Vehicle Safety Act.
