6 recalls listed by Transport Canada for this model year

Label	2024548 15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.	
Powertrain	2019577 15 Nov 2019
Issue: On certain vehicles equipped with a 6-speed automatic transmission, the shifter cable may detach. This could cause the transmission not to shift gears when the shifter is moved. If a driver attempts to exit the car while it is not in the Park position, and the parking brake is not applied, the car could move suddenly. Safety Risk: Sudden and unexpected movement of the car could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to install a new transmission shift cable adjuster.	
Powertrain	2016217 12 May 2016
On certain vehicles equipped with a manual transmission, clutch diaphragm springs may crack or become damaged, which could result in the driver being unable to shift gears, or potentially result in a loss of motive power. Depending on traffic conditions and the driver's reactions, these issues could increase the risk of a crash. Correction: Dealers will install a pedal travel limiter and pedal switch.	

Lights and instruments

2015578 4 Dec 2015

Fiat Chrysler Automobiles (FCA) Canada is conducting a voluntary Customer Satisfaction Notification Program involving certain vehicles equipped with automatic transmissions. Fiat Chrysler Automobiles (FCA) will update the Powertrain Control Module software to improve activation timing of the backup lamps. This updated software will turn the backup lamps on earlier, indicating to other road users that the driver has selected reverse gear. This action is not being conducted under the requirements of the Motor Vehicle Safety Act.

Brakes

2011400 14 Nov 2011

Certain vehicles may have had their brake system inadvertently filled with contaminated brake fluid during vehicle assembly. This could damage certain brake components, which could increase stopping distance, and result in a crash causing property damage and/or personal injury. Correction: Dealers will replace all brake components that come in contact with hydraulic brake fluid.

Label

2011315 23 Aug 2011

On certain vehicles, the compliance label indicates the vehicle type in the unilingual text "PASSENGER CAR" instead of using text in both official languages, or using the bilingual abbreviation "PC/VT". Correction: No corrective recall action is required as the technical non-compliance is deemed to be non-safety related.
