3 recalls listed by Transport Canada for this model year

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Visual system 2020154 9 Apr 2020

Issue: On certain vehicles, the nuts that attach the windshield wiper arms may not have been tightened properly. This could cause the wipers to slip and not clear the windshield properly. Safety Risk: Windshield wipers that do not work properly could affect a driver's visibility. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to tighten the nuts on the windshield wiper arms.

Brakes 2018421 9 Aug 2018

On certain vehicles, a problem with the brake system may cause gas bubbles to form in the brake fluid. This could cause a soft brake pedal feel and a reduction in brake performance, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will bleed the rear brakes as necessary.
