**2** recalls listed by Transport Canada for this model year

### Lights and instruments

2019388 8 Aug 2019

Issue: On certain vehicles, the front amber side reflex reflector does not meet the requirements of Canadian regulations. Safety Risk: This may cause the vehicle to be less visible to others and could create an increased risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to replace the headlight assemblies.

### Engine

2018269 17 May 2018

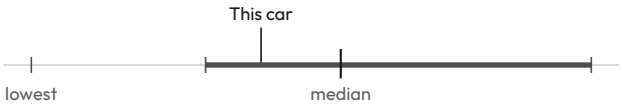

On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired.
