cardog.app/tools/recalls/dodge/journey/2018

6 recalls listed by Transport Canada for this model year

Lights and instruments — 2019388 — 8 Aug 2019

Issue: On certain vehicles, the front amber side reflex reflector does not meet the requirements of Canadian regulations. Safety Risk: This may cause the vehicle to be less visible to others and could create an increased risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to replace the headlight assemblies.

Powertrain — 2018422 — 9 Aug 2018

Certain vehicles may have been built with a defective powertrain controller. If the powertrain controller fails while driving the engine may stall, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the powertrain controller.

Brakes — 2018421 — 9 Aug 2018

On certain vehicles, a problem with the brake system may cause gas bubbles to form in the brake fluid. This could cause a soft brake pedal feel and a reduction in brake performance, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will bleed the rear brakes as necessary.

Other

2018325 15 Jun 2018

Certain vehicles equipped with a rearview mirror backup camera display may fail to conform to the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 111 – Mirrors and Rear Visibility Systems. The cautionary message text in the rearview image display may temporarily reduce the field of view, which is contrary to the requirements of the standard. This could increase the risk of property damage or injury to nearby pedestrians in the event the driver does not check surroundings through traditional means. Correction: Dealers will replace the rearview mirror.

Other

2018324 15 Jun 2018

Certain vehicles equipped with a rearview mirror backup camera display may fail to conform to the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 111 – Mirrors and Rear Visibility Systems. Some conditions may cause the system not to display a rearview image, which is contrary to the requirements of the standard. This could increase the risk of property damage or injury to nearby pedestrians in the event the driver does not check surroundings through traditional means. Correction: Dealers will replace the rearview mirror.

Engine

2018269 17 May 2018

On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired.

> Listed for the model year, not checked against your VIN. Dodge confirms which apply.
> Check your VIN with Mopar Canada or call a Dodge dealer with your VIN.

[6] Window sticker, issued by STELLANTIS, collected 14 Sep 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
