Body	Incomplete – Chassis Cab	Plant	Escobedo, Mexico

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/ford/f-750/2015

4 recalls listed by Transport Canada for this model year

Other

2019420 21 Aug 2019

Issue: This recall is for aftermarket replacement rear window glass produced by Vitro Automotriz. Certain rear window glass may not have been properly tempered. If the window breaks, the glass may separate into large pieces instead of very small ones. Note: This is a voluntary recall that is not being conducted under the requirements of the Motor Vehicle Safety Act. Safety Risk: Glass that breaks in to large pieces could create a risk of injury. Corrective Actions: The company will notify consumers by mail and instruct them to inspect the designation code marked on the rear window glass. Products affected by this recall have the designation "DOT 287" along with the lettering "VMR" (Replacement Market) and a date code that is before July 2019. This information is printed on the bottom corner of the glass. Consumers should contact Vitro's customer service at 1-412-995-6457 or argbacklites@vitro.com to arrange for replacement of the glass.

Brakes

2016139 31 Mar 2016

On certain vehicles, the parking brake connector clip may be out of hardness specification and could fracture when the parking brake lever is applied. This could result in unintended vehicle movement if the vehicle's transmission is not in the PARK gear position, or if the vehicle is not equipped with a transmission having a PARK position. Unintended vehicle movement could result in injury and/or property damage. Correction: Dealers will install a revised parking brake cable connector clip.

Seats and restraints

2015377 18 Aug 2015

Certain vehicles equipped with a 70/30 fixed passenger bench seat may fail to conform to Canada Motor Vehicle Safety Standard 210 – Seat Belt Assembly Anchorages. The floor attachment locations for the 70% front passenger and center seat belt anchorages are outside of the parameters specified by the Standard. An improperly positioned seat belt anchorage may reduce the seat belt's ability to properly restrain the occupant during a crash, increasing the risk of personal injury. Correction: Dealers will install safety restraint anchorage point relocation bracket kits.

Fuel system

2014376 4 Sep 2014

On certain vehicles equipped with Cummins ISB or ISL engines, the fuel filter shell and nut plate could separate, causing a fuel leak and also causing the engine to stall. Stalling would result in a loss of motive power, increasing the risk of a crash resulting in injury and/or damage to property. Correction: Cummins-authorized dealers will replace the fuel filter.

Listed for the model year, not checked against your VIN. Ford confirms which apply.

| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same model year, 1 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
