2 recalls listed by Transport Canada for this model year

Engine 2025083 18 Feb 2025

Issue: On certain vehicles, the piston oil rings may not have been manufactured properly and could damage the cylinder walls. As a result, the engine could make abnormal noises, and a warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This recall only affects certain vehicles equipped with a 2.0L MPI engine. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and/or increase the risk of a vehicle fire. Both issues could increase the risk of a crash or injury. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine. The dealer will also install a software that will monitor the engine and warn you if it detects a problem. If you see this warning, you should contact a dealership to arrange replacement of the engine.

Steering 2022238 6 May 2022

Issue: On a small number of vehicles, the bolt connecting the lower steering column universal joint may not have been properly tightened. If the bolt loosens, you could lose steering control. Safety Risk: A loss of steering control could create a risk of a crash. Corrective Actions: Kia will notify owners by mail and instruct you to bring your vehicle to a dealership to inspect and tighten the lower steering column universal joint bolt, as necessary.

Listed for the model year, not checked against your VIN. Kia confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
