1 recall listed by Transport Canada for this model year

Lights and instruments

2026032 26 Jan 2026

Issue: On certain vehicles, a software problem could cause the instrument cluster display to go blank while driving. As a result, you may not be able to see certain information about the vehicle, including the speedometer, fuel gauge, tire pressure monitoring system (TPMS), warning lights and malfunction tell-tales. Note: This recall only affects certain vehicles equipped with a 12.3-inch instrument cluster display. For the Sorento model, this recall only affects hybrid and plug-in hybrid (PHEV) models. For the Carnival model, both gas and hybrid models are affected. For the Sportage model, gas, hybrid and plug-in hybrid (PHEV) models are affected. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the instrument cluster software. Alternatively, you may schedule an appointment to have the update performed at a Kia dealership.

Listed for the model year, not checked against your VIN. Kia confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
