Body	Sedan	Plant	Aguascalientes City, Aguascalientes, Mexico

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/sentra/2011

2 recalls listed by Transport Canada for this model year

Electrical 2011421 15 Dec 2011

On certain vehicles, the zinc coating applied to the positive battery terminal stud bolt (during the manufacturing process) may be thicker than desired. This could result in a voltage drop that may cause difficulty starting the engine. This can also damage the Engine Control Module (ECM), which could cause the engine to stall. Engine stalling would result in lost vehicle propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will replace the positive battery terminal.

Electrical 2010403 12 Nov 2010

On certain vehicles, a machining irregularity of bolt/washer surface on the positive battery terminal cable end may allow for a gap to occur in the contact area of the terminal. This could result in a voltage drop that may cause difficulty starting the vehicle and could result in damage to the Engine Control Module (ECM). This issue may also cause the engine to stop running while the vehicle is in motion at low speed, which could result in a crash. Correction: Dealers will replace the positive battery terminal cable end.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

Check your VIN with Nissan Canada or call a Nissan dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
