2 recalls listed by Transport Canada for this model year

Brakes

2021114 4 Mar 2021

Issue: On certain vehicles, the stop lamp switch could fail. If this happens, the brake lights may not turn on when the brakes are applied and it may not be possible to start the engine. Safety Risk: Brake lights that do not work properly could result in road users being confused of the driver's intentions, and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to replace the stop lamp switch. The dealer will also install a grommet to protect the switch.

Visual system

2019459 13 Sep 2019

Issue: On certain vehicles, the rear view camera system does not return to the default setting when the transmission is shifted to reverse. This could cause a reduction in rear visibility if a driver had previously adjusted the camera display. Canadian regulations require that the rear view image returns to its original setting each time the camera is turned on. Safety Risk: Reduced rear visibility could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to update the software for the rear view camera.
