3 recalls listed by Transport Canada for this model year

Powertrain

2015366 12 Aug 2015

On certain vehicles, the driver's foot could contact the edge of the center console lower trim panel, which could impede smooth accelerator pedal operation. The panel edge could also catch the driver's shoe, potentially resulting in a delay in the driver being able to shift their foot from the accelerator to the brake pedal. This could increase stopping distances, potentially resulting in a crash causing injury and/or damage to property. Correction: Dealers will modify the lower trim panel.

Seats and restraints

2013255 25 Jul 2013

Certain vehicles fail to comply with the requirements of Canada Motor Vehicle Safety Standard 207 – Anchorage of Seats. Bolts securing the rear seat back latch may have been manufactured incorrectly. As a result, the seat anchorage could fail to meet the strength requirements of the standard. This could increase the risk of injury to rear seat occupants in a crash. Correction: Dealers will replace the bolts.

Structure

2013254 24 Jul 2013

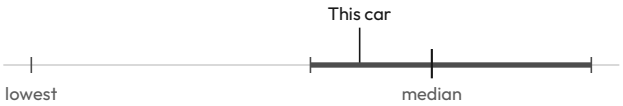

On certain vehicles, lower sill bolts may have been insufficiently tightened or may be missing. If bolts are missing, vehicle rear impact performance may be affected which could increase the risk of injury in a crash. Correction: Dealers will inspect and tighten or replace bolts as necessary.
