5 recalls listed by Transport Canada for this model year

Lights and instruments

2026250 21 May 2026

Issue: On certain vehicles, a software problem could cause the instrument cluster not to display when the vehicle is started. As a result, you may not be able to see certain information about the vehicle, including the speedometer, gear selection indicators, warning lights and malfunction tell-tales. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the instrument cluster software.

Visual system

2025264 15 May 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the centre information display software.

Lights and instruments

2025177 7 Apr 2025

Issue: On certain vehicles, the warnings reminding the driver to shift the transmission into Park (P) if the ignition is in the "OFF" position and the gear selector is not in the "P" position may not work. As a result, if the ignition is switched off and the gear selector is not in Park, the vehicle could move suddenly. Note: This recall replaces Transport Canada recall no. 2024-782. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A parked vehicle that moves suddenly could create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software.

Label

2025155 25 Mar 2025

Issue: On certain vehicles, the compliance label may list the wrong gross vehicle weight rating (GVWR) and gross axle weight rating (GAWR) information. This could lead you to overload the vehicle and cause poor handling or a tire failure. Additionally, for certain SR trim models equipped with the optional 19-inch wheel package, the compliance label may list the wrong tire and rim sizes. As a result, when the rims and tires are replaced, the wrong rims and/or tires could be installed. Safety Risk: Poor handling or a tire failure could cause a loss of vehicle control and result in a crash. Corrective Action: Nissan will mail a new compliance label to each owner. If you would like help to install it, you can contact a Nissan dealer to have it installed free of charge.

Lights and instruments

2024782 24 Dec 2024

This recall was replaced by Transport Canada recall no. 2025-177. Issue: On a small number of vehicles, the warnings reminding the driver to shift the transmission into Park (P) if the ignition is in the "OFF" position and the gear selector is not in the "P" position may not work. As a result, if the ignition is switched off and the gear selector is not in Park, the vehicle could move suddenly. Safety Risk: A parked vehicle that moves suddenly could create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

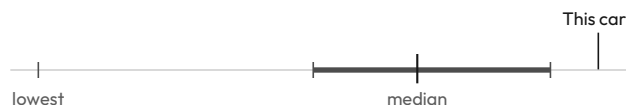

Check your VIN with Nissan Canada or call a Nissan dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
