2 recalls listed by Transport Canada for this model year

Airbag 2015220 22 May 2015

On certain vehicles, in the event of a collision that warrants a deployment of the front passenger airbag, the deploying airbag could strike the passenger sun visor if it is in the down position. This could cause the sun visor to detach from its mounting bracket, potentially contacting an occupant, which would increase the risk of injury. Correction: Dealers will add a tether strap to the passenger sun visor.

Fuel system 2003277 10 Nov 2003

On certain vehicles, the fuel return line hose fitting on the electric fuel pump may be restricted, causing excessive fuel pressure to build up in the fuel injection system. Excessive fuel pressure may result in the fuel return hose becoming dislodged, resulting in fuel leakage. Fuel leakage in the presence of an ignition source could result in a fire. Correction: Dealer will inspect the fuel pump pressure. Those vehicles exhibiting higher than normal fuel pump pressure will receive fuel pump modifications.
