Make	Mazda	Fuel	Gasoline
Model	B-Series	Drive	4WD
Trim	Not in the decode	Maker	FORD MOTOR COMPANY
Body	Pickup	Plant	St. Paul, Minnesota, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/mazda/b-series/2009

3 recalls listed by Transport Canada for this model year

Airbag

2021145 12 Mar 2021

Issue: On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the driver-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Action: Mazda will notify owners by mail and instruct you to take your vehicle to a dealer to replace the driver-front airbag inflator. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Airbag

2018039 19 Jan 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected. Note: This recall supersedes recall 2017-013 (Mazda Recall 0817A). Vehicles repaired under the previous recall require a final repair under this recall, as the previous recall remedy was an interim repair. Interim repair parts must be replaced with final repair parts.

Steering

2009030 29 Jan 2009

On certain vehicles, the front spindles may not have received adequate heat treatment during the manufacturing process. As a result, the spindle may fracture, allowing the spindle and wheel assembly to separate from the vehicle while underway. This could cause a loss of vehicle control and a crash. In addition, the errant wheel assembly could strike a vehicle, property, or a bystander, which could result in personal injury or death.

Correction: Dealers will inspect and, if necessary, replace the front spindles.

Listed for the model year, not checked against your VIN. Mazda confirms which apply.

| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same model year, 2 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
