4 recalls listed by Transport Canada for this model year

Electrical 2024171 15 Mar 2024

Issue: On certain vehicles, the bolt for the 48 V ground connection under the passenger seat may not have been tightened properly. As a result, the wiring could overheat and melt. Safety Risk: Wiring that overheats and melts can create the risk of a fire. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the ground connection.

Structure 2024104 16 Feb 2024

Issue: On certain vehicles, the accelerator pedal bracket may not have been welded properly. As a result, the pedal could deform and/or detach. If this happens, the accelerator pedal could stay applied and/or block the brake pedal, causing reduced braking. Safety Risk: A vehicle that doesn't slow down as expected or accelerates on its own could increase the risk of a crash. Additionally, reduced braking can increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to secure the accelerator pedal bracket.

Fuel system 2023672 15 Dec 2023

Issue: On certain vehicles, the fuel delivery module could fail. If this happens, the engine may run rough or may not start. This could also result in a sudden loss of engine power while driving. Note: This is an expansion of Transport Canada recall 2023-353. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel delivery module.

Brakes

2023635 27 Nov 2023

Issue: Under certain conditions, a software problem for the electronic stability control (ESP) control unit could cause the power brake assist not to work properly. As a result, there may be an increase in brake pedal effort and reduced braking. Note: This recall only affects plug-in hybrid (PHEV) models. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the ESP control unit software.

Listed for the model year, not checked against your VIN. Mercedes-Benz confirms which apply.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same configuration, 19 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 29 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
