Body	Sport Utility Vehicle	Plant	Kecskemet, Hungary

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/mercedes-benz/gle-class/2022

11 recalls listed by Transport Canada for this model year

Airbag 2024567 27 Sep 2024

Issue: On certain vehicles, the wiring harness for an acceleration sensor may not have been routed properly. As a result, the wiring could become damaged in a crash and cause the driver- and passenger-front airbags to deploy with too much force. Safety Risk: An airbag that inflates with too much force could create an increased risk of injury in a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, re-route the wiring harness.

Electrical 2024171 15 Mar 2024

Issue: On certain vehicles, the bolt for the 48 V ground connection under the passenger seat may not have been tightened properly. As a result, the wiring could overheat and melt. Safety Risk: Wiring that overheats and melts can create the risk of a fire. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the ground connection.

Powertrain 2024103 16 Feb 2024

Issue: Under certain conditions, a software problem could cause the engine to stall during a downshift. As a result, there could be a sudden loss of power to the wheels. Note: This recall only affects vehicles equipped with a V6 engine and a 9-speed automatic transmission. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the transmission control unit software.

Fuel system

2023672 15 Dec 2023

Issue: On certain vehicles, the fuel delivery module could fail. If this happens, the engine may run rough or may not start. This could also result in a sudden loss of engine power while driving. Note: This is an expansion of Transport Canada recall 2023-353. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel delivery module.

Electrical

2023651 8 Dec 2023

Issue: On certain vehicles, the bolt for the 12V ground connection under the driver seat may not have been properly tightened. As a result, the connection could loosen and overheat. Safety Risk: A loose or overheated ground connection could create the risk of a fire. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, repair the 12V ground connection.

Fuel system

2023353 23 Jun 2023

Issue: On certain vehicles, the fuel delivery module could fail. If this happens, the engine may run rough or may not start. This could also result in a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel delivery module.

Window sticker We do not collect window stickers for this manufacturer.

SOURCES

- [1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year

- [3] Cardog market quote, same model year, 63 live listings, as of 29 Oct 2026
[4] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
