1 recall listed by Transport Canada for this model year

Lights and instruments

2022394 21 Jul 2022

Issue: Over time, the backup lamp switch could corrode and fail. If this happens, the backup lamps will not turn on when the transmission is shifted into reverse and the shift position will not display. Additionally, for vehicles equipped with a rearview camera, the camera image will not appear on the display in the instrument cluster. Safety Risk: Backup lamps that do not work properly could cause a person not to recognize that the vehicle is backing. A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. These issues could increase the risk of a crash. Corrective Actions: Subaru will notify owners by mail and instruct you to take your vehicle to a dealership to inspect, and if necessary, replace the backup lamp switch.
