cardog.app/tools/recalls/lucid/air/2022

13 recalls listed by Transport Canada for this model year

Lights and instruments

2026404 20 Aug 2026

Issue: On certain vehicles, the circuits for the exterior lighting may not have proper circuit protection. As a result, the wiring and components could overheat and melt, and the exterior lights may not work. Safety Risk: Wiring and/or components that overheat and melt can create the risk of a fire. Exterior lights that don't work could increase the risk of a crash. Corrective Actions: To reduce the safety risk, Lucid advises that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed. Lucid will notify owners by mail. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.10.0 or a later release.

Visual system

2026012 16 Jan 2026

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Note: This problem would cause a "Camera Error. Turn your vehicle off and on again" message to be displayed. This recall only affects vehicles equipped with the optional DreamDrive Pro package. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Lucid will notify owners by mail. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.8.17 or a later release.

Visual system

2025536 7 Oct 2025

Issue: On a small number of vehicles, a software problem could cause the rearview camera image to be delayed or not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Lucid will notify owners by email. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.8.0 or a later release.

Accessories

2025152 25 Mar 2025

Issue: This recall is for certain all-weather floor mats that were sold as a Lucid genuine accessory. On certain vehicles, the accelerator pedal could get stuck on the floor mat. If this happens, the vehicle may not slow down when you release the accelerator pedal. Note: This recall is not being conducted under the requirements of the Motor Vehicle Safety Act. Safety Risk: A stuck accelerator pedal could cause an unintended acceleration and increase the risk of a crash. Corrective Actions: To reduce the safety risk, Lucid advises you to remove the driver's all-weather floor mat. Lucid will notify owners by email and provide you with instructions for how to inspect the all-weather floor mats. You should contact Lucid customer care or a Lucid service center if you would like help inspecting the all-weather floor mats. Lucid will reimburse owners of the affected all-weather floor mats.

High voltage

2024377 1 Jul 2024

Issue: On certain vehicles, the high-voltage connections could lose contact intermittently. As a result, the fail-safe software could cause the contactors for the high-voltage battery to open while driving. If this happens, there could be a sudden loss of power to the wheels. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Lucid will notify owners by email. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center.

Powertrain

2024069 7 Feb 2024

Issue: Under certain conditions, a software problem could cause a loss of power to the wheels. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Lucid will notify owners by e-mail. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.1.30 or a later release.

§5 DOCUMENTS

Window sticker	We do not collect window stickers for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 3 live listings, as of 7 Nov 2026

[5] Live public dealer listings on Cardog, as of 7 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
