Make	Nissan	Fuel	Gasoline
Model	NV	Drive	RWD
Trim	Not in the decode	Maker	NISSAN NORTH AMERICA, INC.
Body	Van	Plant	Canton, Mississippi, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/nv/2013

3 recalls listed by Transport Canada for this model year

Airbag 2020136 31 Mar 2020

Issue: On certain vehicles, the driver-front airbag inflator could be defective. This could cause the airbag to deploy with more force than normal. It could also cause the inflator to rupture. If the airbag inflator ruptures, fragments could be propelled toward the occupants or cause damage to the airbag and prevent it from inflating properly. Safety Risk: If the vehicle is involved in a crash where the airbag deploys, the airbag inflator could rupture and create a risk of injury or death. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to replace the driver-front airbag inflator or airbag module.

Other 2013081 13 Mar 2013

On certain vehicles, a change in the solution used for anti-rust protection (applied during vehicle assembly) resulted in a chemical reaction that affected the foam that is used as a sound dampener in the shifter mechanism. This may cause the foam to adhere to the lever lock, preventing it from returning to the locked position. If this occurs, the transmission gear shift lever could be moved out of the PARK position without depressing the brake pedal. Depending which gear the driver selects, the vehicle could begin to move forward or backward immediately. This movement could result in property damage, or cause the vehicle to strike a bystander, potentially resulting in personal injury. Correction: Dealers will remove the foam dampener from the shifter mechanism.

Powertrain 2013080 13 Mar 2013

On certain vehicles, the transmission lever gear selector plate lock clip may have been installed incorrectly during vehicle assembly. Over time, the clip could disengage from the steering column bracket, allowing the transmission cable to move out of position. If this occurs, the transmission shift lever will not match the actual gear position. The driver would be able to remove the key from the ignition, even if the transmission is not actually in the PARK position. This could allow the vehicle to roll away, which could result in a crash causing personal injury and/or property damage. Correction: Dealers will inspect and, if necessary, reposition the clip.

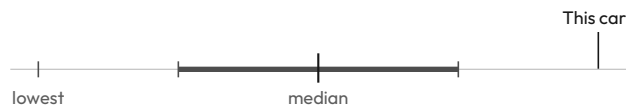

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
