Body	Sport Utility Vehicle	Plant	Lincoln, Alabama, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/honda/passport/2023

4 recalls listed by Transport Canada for this model year

Structure

2026275 4 Jun 2026

Issue: On certain vehicles, the suspension mounting points on the rear subframe could rust. As a result, rear suspension components could fail. This could lead to poor handling and a loss of vehicle control. Safety Risk: A loss of control could create the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to inspect and install a rear subframe reinforcement kit or replace the subframe, as necessary.

Fuel system

2024725 27 Nov 2024

Issue: On certain vehicles, the fuel filler pipe may not have been connected properly to the filler neck. As a result, the connection could separate in a crash, and fuel could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Honda will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, reposition the fuel filler pipe.

Brakes

2023365 29 Jun 2023

Issue: On certain vehicles, the brake master cylinder could separate from the brake booster. If this happens, braking could be reduced or you could experience a complete loss of brakes. Safety Risk: Reduced braking or a loss of brakes can increase the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to inspect the brake master cylinder and brake booster. The dealer will inspect for any missing nuts and damaged brake booster parts and replace them as necessary.

Visual system

2023350 15 Jun 2023

Issue: On certain vehicles, the terminals on the coaxial cable for the audio display unit may not have been manufactured correctly. As a result, the audio display unit could lose its connection, and the rearview camera image may not display when the transmission is shifted into reverse gear.

Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash.

Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to replace the media oriented systems transport (MOST) cable harness, and install a cover over the audio display unit connector.

Listed for the model year, not checked against your VIN. Honda confirms which apply.
Check your VIN with Honda Canada or call a Honda dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
