3 recalls listed by Transport Canada for this model year

Structure — 2026275 — 4 Jun 2026

Issue: On certain vehicles, the suspension mounting points on the rear subframe could rust. As a result, rear suspension components could fail. This could lead to poor handling and a loss of vehicle control. Safety Risk: A loss of control could create the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to inspect and install a rear subframe reinforcement kit or replace the subframe, as necessary.

Visual system — 2024265 — 9 May 2024

Issue: On certain vehicles, the tailgate wiring harness could become damaged. As a result, the rearview camera image may not display when the transmission is shifted into the reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to replace the tailgate wiring harness.

Brakes — 2023365 — 29 Jun 2023

Issue: On certain vehicles, the brake master cylinder could separate from the brake booster. If this happens, braking could be reduced or you could experience a complete loss of brakes. Safety Risk: Reduced braking or a loss of brakes can increase the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to inspect the brake master cylinder and brake booster. The dealer will inspect for any missing nuts and damaged brake booster parts and replace them as necessary.
