2 recalls listed by Transport Canada for this model year

Seats and restraints

2014181 21 May 2014

On certain vehicles, the flexible steel cable that connects the seat belt to the vehicle structure at the front outboard seating positions can fatigue over time and could separate, increasing the risk of injury in a crash. Correction: Dealers will inspect and repair or replace the lap pretensioner, as necessary.

Airbag

2014081 18 Mar 2014

On certain vehicles, side airbag wiring connections could develop high resistance, illuminating the airbag warning light. If the vehicle continues to be operated in this condition, resistance may continue to increase over time and eventually cause the seat side airbags and seat belt pretensioners to not deploy in the event of a crash, which could increase the risk of injury. Correction: Dealers will affect repairs.
