1 recall listed by Transport Canada for this model year

Lights and instruments

2008077 4 Mar 2008

On certain vehicles, the Daytime Running Lamp (DRL) resistor may crack. If water and road salt enters the crack, it could corrode the resistor. This could result in a loss of DRL illumination, and therefore, vehicles may be less visible to other motorists and pedestrians during daylight hours, possibly resulting in a crash causing personal injury or death. Correction: Dealers will replace the resistor until 7 years or 112,000 km from date vehicle was originally placed into service.
