Body	Sport Utility Vehicle	Plant	Louisville, Kentucky, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/lincoln/corsair/2024

3 recalls listed by Transport Canada for this model year

High voltage 2026070 18 Feb 2026

Issue: On certain vehicles, the software update installed by a Ford dealer during recall 24S79 (Transport Canada recall no. 2024-781) may not be effective. As a result, a second repair is required. On certain vehicles, a problem inside the high-voltage battery could cause a short circuit. If this happens, there could be a loss of power to the wheels and/or the high-voltage battery could overheat. Note: This recall replaces Transport Canada recall no. 2025-628. This recall only affects certain plug-in hybrid vehicles (PHEV) equipped with a 2.5 L engine. Safety Risk: A loss of power to the wheels could increase the risk of a crash. A battery that overheats can create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: To reduce the safety risk, Ford advises that you set the maximum charge setting of your vehicle at 80% and to only use normal EV mode until the recall repairs have been completed. Ford will notify owners by mail. The corrective actions for this recall are under development.

Engine 2025281 23 May 2025

Issue: On certain vehicles, the engine block heater could overheat when the block heater is plugged in. Note: This recall only affects certain vehicles equipped with a 1.5 L or 2.0 L engine and a factory-installed block heater. Safety Risk: An engine block heater and/or wiring that overheats or melts could create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to plug in the engine block heater until the recall repairs have been completed. Ford will notify owners by mail. You can choose to have the dealer remove the block heater, or once the final repair is available, Ford will send you another notice to advise you to take your vehicle to a dealership to replace the block heater element. The dealer will also inspect and, if necessary, replace the block heater electrical cord.

Visual system

2025260 9 May 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display or to freeze when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the SYNC software. Alternatively, you may schedule an appointment to have the update performed at a Ford dealership.

Listed for the model year, not checked against your VIN. Lincoln confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
