§2 OBLIGATIONS [2]

cardog.app/tools/recalls/lincoln/mkc/2019

4 recalls listed by Transport Canada for this model year

Electrical — 2026005 — 9 Jan 2026

Issue: On certain vehicles, the engine block heater could leak coolant. If this happens, the block heater could short circuit when it's plugged in. Note: This recall replaces Transport Canada recall no. 2025-554. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to use the engine block heater until the recall repairs have been completed. Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the block heater. Alternatively, owners can choose to have the dealership permanently disable the engine block heater.

Electrical — 2025554 — 10 Oct 2025

This recall was replaced by Transport Canada recall no. 2026-005. Issue: On certain vehicles, the engine block heater could leak coolant. If this happens, the block heater could short circuit when it's plugged in. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to use the engine block heater until the recall repairs have been completed. Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the block heater.

Visual system — 2025449 — 3 Sep 2025

Issue: On certain vehicles, there could be a problem with the connections inside the rearview camera. As a result, the rearview camera image may not display correctly or at all when the transmission is shifted into reverse. Note: For certain models, this recall also affects incomplete vehicles. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the rearview camera.

Electrical 2023310 29 May 2023

Issue: On certain vehicles, the battery monitor sensor could be damaged during servicing. If this happens, the battery monitor system could short circuit. Safety Risk: A short circuit could create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: Ford will notify owners by mail and instruct you to bring your vehicle to a Ford dealership to install an in-line fuse for the battery monitor sensor. Ford advises to park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed.

> Listed for the model year, not checked against your VIN. Lincoln confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 11 live listings, as of 27 Nov 2026

[5] Live public dealer listings on Cardog, as of 28 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
