2 recalls listed by Transport Canada for this model year

Airbag 2020136 31 Mar 2020

Issue: On certain vehicles, the driver-front airbag inflator could be defective. This could cause the airbag to deploy with more force than normal. It could also cause the inflator to rupture. If the airbag inflator ruptures, fragments could be propelled toward the occupants or cause damage to the airbag and prevent it from inflating properly. Safety Risk: If the vehicle is involved in a crash where the airbag deploys, the airbag inflator could rupture and create a risk of injury or death. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to replace the driver-front airbag inflator or airbag module.

Brakes 2013312 18 Sep 2013

On certain vehicles, the brake master cylinder could malfunction, causing a reduction in braking performance which could increase stopping distances and potentially result in a crash causing injury and/or damage to property. Correction: Dealers will inspect the master cylinder and replace those in the affected range.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
