2 recalls listed by Transport Canada for this model year

Airbag 2020136 31 Mar 2020

Issue: On certain vehicles, the driver-front airbag inflator could be defective. This could cause the airbag to deploy with more force than normal. It could also cause the inflator to rupture. If the airbag inflator ruptures, fragments could be propelled toward the occupants or cause damage to the airbag and prevent it from inflating properly. Safety Risk: If the vehicle is involved in a crash where the airbag deploys, the airbag inflator could rupture and create a risk of injury or death. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to replace the driver-front airbag inflator or airbag module.

Seats and restraints 2015356 6 Aug 2015

Certain vehicles may not comply with Canada Motor Vehicle Safety Standard 209 - Seat Belt Assemblies. Incorrect driver and passenger front seat belt buckles may have been installed at time of vehicle assembly. This could result in the buckles failing to unlatch when the unlatch button is depressed, or not properly latch, failing to meet the requirements of the standard. This could increase the risk of injury and/or damage to property in a crash. Correction: Dealers will inspect the seat belt buckles and replace as necessary.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

Check your VIN with Nissan Canada or call a Nissan dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
