2 recalls listed by Transport Canada for this model year

Airbag 2023053 10 Feb 2023

Issue: On certain vehicles, the plastic emblem on the steering wheel airbag cover could detach and become a projectile when the airbag inflates in a crash. Note: This recall is for certain vehicles that had the steering wheel airbag replaced. Safety Risk: Projectiles in the occupant compartment could increase the risk of an injury. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the steering wheel airbag cover.

Engine 2011436 20 Dec 2011

On certain vehicles, the engine oil cooler stud (onto which the oil filter is mounted) could fail. This could cause an engine oil leak, which could illuminate the instrument panel's engine oil warning lamp. Abnormal noise and rough engine performance may also be noticed and, in the worst case, the engine could fail and stop suddenly while the vehicle is in motion. Engine failure would result in lost vehicle propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will replace the engine oil cooler connector stud.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
