Structure

2022313 14 Jun 2022

Issue: Over time, dirt buildup could cause the secondary hood latch to stick open after it is used. If this happens, and the primary hood latch is released, the hood may open suddenly while driving. Safety Risk: A hood that opens suddenly while driving could block the driver's view and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to replace the secondary hood latch.

Seats and restraints

2016179 25 Apr 2016

On certain vehicles, a defect in the occupant classification system could allow an adult sitting in the front passenger seat to be classified as a child or an "empty seat". This would suppress the airbag, which could increase the risk of injury in a crash. Correction: For affected Altima, Maxima, Murano, Rogue and Sentra vehicles, dealers will reprogram the airbag control unit and the occupant classification system control unit. For affected Leaf, NV200, Pathfinder, Q50 and JX35/QX60 vehicles, dealers will replace the occupant classification system electronic control unit.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
