3 recalls listed by Transport Canada for this model year

Seats and restraints

2026170 6 Apr 2026

Issue: On certain vehicles, the lower anchor for the front seat belt(s) may have been damaged during service. As a result, the seat belt(s) could detach in a crash. Note: For the 2026 model year Santa Fe, this recall only affects the Santa Fe hybrid (HEV) model. Safety Risk: A seat belt that detaches in a crash could increase the risk of injury. Corrective Actions: The company will notify owners in writing and advise you to take your vehicle to a dealership to inspect and reinforce the lower seat belt anchors. The seat belt assemblies will be replaced, as necessary.

Visual system

Issue: On certain vehicles, the wiring harness for the rearview camera may not have been manufactured properly. As a result, the wiring could become damaged and cause the rearview camera image not to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Hyundai will notify owners in writing and advise you to take your vehicle to a dealership to replace the camera wiring harness.

Electrical

2025529 2 Oct 2025

Issue: On certain vehicles, the starter motor's terminal cover may not have been installed properly. As a result, the positive terminal could be exposed and contact nearby components in a crash. If this happens, there could be a short circuit. Safety Risk: A short circuit could create the risk of a fire and/or injury. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, reinstall the starter motor positive terminal cover.
