## 2 recalls listed by Transport Canada for this model year

### Structure

2026330 8 Jul 2026

Issue: On certain vehicles, the rear axle carriers (knuckles) may not have been manufactured properly. As a result, the rear knuckle(s) could break and separate at the toe control arm mounting point. If this happens, there could be a loss of vehicle stability. Safety Risk: A loss of vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to inspect and replace the rear axle carrier sub-assemblies, as necessary.

### Visual system

2025594 30 Oct 2025

Issue: Under certain conditions, a software problem could cause the rearview camera image to freeze or not to display. If this happens, the rearview image may not display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Note: This recall only affects certain vehicles equipped with a panoramic view monitor system. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: The company will notify owners in writing and advise you to take your vehicle to a dealership to update the parking assist ECU software.

Listed for the model year, not checked against your VIN. Toyota confirms which apply.
