4 recalls listed by Transport Canada for this model year

Engine	2026331	8 Jul 2026
Issue: On certain vehicles, the engine starter may not have been manufactured properly. As a result, the starter could overheat. Note: This recall is an expansion of Transport Canada recall no. 2026-040. Safety Risk: A starter that overheats can create the risk of a fire. Corrective Actions: To reduce the safety risk, BMW recommends not using the remote start function and not leaving the vehicle unattended with the engine running until the recall repairs have been completed. BMW will notify owners by mail and advise you to take your vehicle to a dealership to replace the engine starter.

Label	2024544	15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.		

Powertrain

2023646 6 Dec 2023

Issue: On certain vehicles, the integrated transmission control unit (ITCU) may not be sealed properly. As a result, transmission oil could leak into the unit and cause the transmission gears to seize. If this happens, there could be a loss of power to the wheels. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: BMW will notify owners by mail and advise you to take your vehicle to a dealership to replace the ITCU. The dealer will also inspect the transmission fluid and replace it, if necessary.
