2 recalls listed by Transport Canada for this model year

Fuel system 2025638 18 Nov 2025

Issue: On certain vehicles, the check valve for the purge control system could wear and cause the fuel tank to expand. As a result, the fuel tank could contact hot components and fuel could leak. Note: This recall only affects certain vehicles equipped with a 1.6 L turbocharged engine.
Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to replace the check valve and update the electronic control unit (ECU) software. The dealer will also inspect and, if necessary, replace the fuel tank.

Structure 2025398 30 Jul 2025

Issue: On certain vehicles, the exterior trims on the C-pillars may not be properly attached. As a result, the trim(s) could loosen and separate from the vehicle. Safety Risk: Parts that detach from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to replace the exterior C-pillar trims.
