Body	Sedan	Plant	Fremont, California, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/tesla/model-3/2020

16 recalls listed by Transport Canada for this model year

Lights and instruments

2026401 19 Aug 2026

Issue: On certain vehicles, the low beam headlights may be too bright. Canadian regulations specify a maximum brightness for low beam headlights. Safety Risk: Low beam headlights that are too bright could cause reduced visibility for the driver and/or glare for oncoming drivers and increase the risk of a crash. Corrective Actions: Tesla will notify owners by email. The corrective actions for this recall are under development.

Seats and restraints

2024298 28 May 2024

Issue: On certain vehicles, the seat belt reminder chime and visual warning may not work when you start the vehicle and your seat belt is not buckled. Canadian regulations require both a seat belt reminder sound and visual telltale when a driver is not wearing their seat belt. Safety Risk: A seat belt warning that doesn't work correctly may not remind you to buckle your seat belt. Not wearing your seat belt can increase the risk of injury in a crash. Corrective Actions: Tesla will notify owners by email and supply an over-the-air software update to activate the seat belt reminder chime and visual warning.

Lights and instruments

2024283 21 May 2024

Issue: A previous over-the-air (OTA) software update could cause the vehicle not to display the correct visual warning indicators when there are problems with the brake system or when the parking brake is applied. As a result, the BRAKE, PARK, and antilock brake system (ABS) visual indicators would display as text instead of symbols. Safety Risk: While there is a low risk to safety, Canadian regulations require visual warnings to use common symbols, instead of words, to avoid driver confusion. Corrective Actions: Tesla will notify affected owners by email. Tesla has released an over-the-air software update to fix this problem. There is no further action required if your vehicle has software release 2024.3.25, 2024.14.5, or a release later than 2024.14.5.

Other

2024130 27 Feb 2024

Issue: On certain vehicles, a software problem could cause the pedestrian warning system not to work. As a result, the vehicle may not produce enough sound to be detected by other road users. New Canadian regulations require electric vehicles to make a minimum sound level when operating at low speeds. Safety Risk: A pedestrian warning system that doesn't work could create an increased risk of injury for other road users. Corrective Actions: Tesla will notify affected owners by email. Tesla has released an over-the-air software update to fix this problem. There is no further action required if your vehicle has software release 2023.44.30.14 or a software deployed after 2023.44.30.14.

Accessories

2023657 12 Dec 2023

Issue: On vehicles equipped with the Autosteer advanced driver-assistance feature, when using the feature, the vehicle may not provide strong enough warnings or monitor the driver closely enough to prevent misuse of the feature. Safety Risk: A driver that doesn't pay close attention while using the Autosteer feature or who doesn't react quickly when Autosteer is canceled could have an increased risk of a crash. Corrective Actions: Tesla will notify owners by email and supply an over-the-air software update to improve driver monitoring and alerts while using the Autosteer feature. Tesla advises that you must always pay attention and be ready to take control of the vehicle at any time while using the Autosteer advanced driver-assistance feature.

Accessories

2023063 14 Feb 2023

Issue: In certain traffic situations, when the FSD Beta advanced driver assistance feature is engaged, the vehicle may perform maneuvers that break certain traffic laws, if the driver doesn't intervene and take control. Note: This recall only affects vehicles equipped with the FSD Beta feature. Safety Risk: Certain maneuvers performed by the FSD Beta advanced driver assistance feature may break traffic laws. This could increase the risk of a crash if the driver doesn't intervene. Corrective Actions: Tesla will notify owners by email and supply an over-the-air software update to improve how the FSD Beta feature maneuvers the vehicle in certain traffic situations. Tesla reminds that FSD Beta is only an advanced driver assistance feature, and the driver must pay attention and be ready to take control at all times when the feature is engaged.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same configuration, 37 live listings, as of 22 Nov 2026
[5] Live public dealer listings on Cardog, as of 23 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
