3 recalls listed by Transport Canada for this model year

Label	2024544	15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.		
Structure	2019582	18 Nov 2019
Issue: On certain vehicles, the attachment points for the lower universal anchorage system (for attaching a child seat) could be damaged over time. As a result, a child seat may come loose. Safety Risk: A child seat that is not properly secured could create an increased risk of injury in a crash. Corrective Actions: BMW will notify owners by mail and instruct you to take your vehicle to a dealer to add a reinforcing bracket to the lower anchor bars and the vehicle body.		
Label	2017269	19 May 2017
Certain M-Series vehicles may fail to comply with the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 110 - Tire Selection and Rims. For some X5 M and X6 M vehicles, the tire and loading information label incorrectly states the vehicles were equipped with 20-inch tires, however the vehicles are equipped with 21-inch tires. For some M6 Cabriolet and M6 Coupe vehicles, the tire and loading information label incorrectly states the vehicles were equipped with 19-inch tires, however the vehicle is equipped with 20-inch tires. Additionally, the label for the M6 Cabriolet and M6 Coupe vehicles incorrectly displays a value of 32psi (220 kPa), although it should display a value of 35psi (240kPa). Correction: Dealers will replace the Tire and Loading label.
