1 recall listed by Transport Canada for this model year

Structure

2016317 21 Jun 2016

On certain vehicles, road salt can corrode the front crossmember assembly, which may ultimately lead to separation of the control arm at the mounting point. This would allow the wheel to rotate off its designed axis, and could result in a loss of vehicle control and a crash causing property damage and/or personal injury. Correction: Dealers will inspect the crossmember and apply an anti-corrosion treatment or replace the assembly, as required.

Listed for the model year, not checked against your VIN. Mitsubishi confirms which apply.
