3 recalls listed by Transport Canada for this model year

Airbag 2024536 18 Sep 2024

Issue: On certain vehicles, a software problem could cause the driver-front and passenger-front airbags to deploy with too much force in certain crashes. Note: This recall only affects 124 Spider Abarth performance models. Safety Risk: An airbag that inflates with too much force could create an increased risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to update the airbag control module software.

Label 2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Powertrain 2019051 6 Feb 2019

Issue: A problem with the automatic transmission could cause it to downshift suddenly. This may cause the rear wheels to slow abruptly and create a loss of vehicle stability. Safety Risk: A loss of vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer for an update to the transmission control module (TCM).

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
