3 recalls listed by Transport Canada for this model year

Lights and instruments

2022394 21 Jul 2022

Issue: Over time, the backup lamp switch could corrode and fail. If this happens, the backup lamps will not turn on when the transmission is shifted into reverse and the shift position will not display. Additionally, for vehicles equipped with a rearview camera, the camera image will not appear on the display in the instrument cluster. Safety Risk: Backup lamps that do not work properly could cause a person not to recognize that the vehicle is backing. A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. These issues could increase the risk of a crash. Corrective Actions: Subaru will notify owners by mail and instruct you to take your vehicle to a dealership to inspect, and if necessary, replace the backup lamp switch.

Brakes

2019104 1 Mar 2019

Issue: On certain vehicles, the brake lamp switch could fail. This would cause the brake lamps not to turn on when the brakes are applied. Depending on the model, this could cause an inability to shift from park or to start using the push-button ignition. This may also cause problems with the following: anti-lock brake system (ABS), vehicle dynamics control (VDC), and/or Eyesight system. Safety Risk: If the brake lights do not work, a following driver may not to recognize that a vehicle ahead is braking, increasing the risk of crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have the brake lamp switch replaced.

Engine

2016122 17 Mar 2016

On certain vehicles, a portion of the engine turbocharger air intake duct may crack due to incorrect material being used during production. If the air intake duct were to crack, it could result in the engine developing a rough idle, reduced power and possibly a stall. Engine stalling would result in lost propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will inspect the engine turbocharger air intake duct, and replace as necessary.

Listed for the model year, not checked against your VIN. Subaru confirms which apply.

SOURCES

- | | |
|---|---|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 20 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
