**3** recalls listed by Transport Canada for this model year

### Label

2024546 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Subaru has corrected the compliance label for all new vehicles.

### Powertrain

2023606 9 Nov 2023

Issue: On certain vehicles, the front axle shafts may not have been manufactured properly. As a result, the axle shaft(s) could break and cause a loss of power to the wheels. Additionally, if the vehicle is parked and the parking brake isn't applied, the vehicle could roll away. Safety Risk: A loss of power to the wheels could increase the risk of a crash. A parked vehicle that rolls away could also create the risk of an injury or a crash. Corrective Actions: Subaru will notify owners by mail and advise you to take your vehicle to a dealership to inspect the front axle shafts and, if necessary, replace them.

### Electrical

2023435 4 Aug 2023

Issue: On certain vehicles, the instrument panel wiring harness could become damaged by contact with the steering beam bracket. If this happens, the wiring harness could short circuit and cause a sudden loss of engine power. Safety Risk: A loss of engine power could increase the risk of a crash. Corrective Actions: Subaru will notify owners by mail and advise you to take your vehicle to a dealership to inspect and secure the instrument panel wiring harness. If damage is found, the wiring harness will be repaired or replaced as necessary.
