 recalls listed by Transport Canada for this model year**Label** 2024546 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Subaru has corrected the compliance label for all new vehicles.

Suspension 2021226 15 Apr 2021

Issue: On certain vehicles, the bolts for the rear stabilizer bracket could loosen over time. This may cause a rattling notice from the rear of the vehicle. If you continue to drive with this problem, the bolts could detach. If this happens, vehicle stability could be reduced. Safety Risk: Reduced vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: Subaru will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the condition of the bolts on the rear stabilizer bracket, and tighten them, if necessary. If a bolt is missing, the dealer will install a new bolt.

Engine

2019604 2 Dec 2019

Issue: On certain vehicles, the positive crankcase ventilation (PCV) valve could fail. If you continue to operate the vehicle after this happens, pieces of the PCV valve may enter the engine and cause an engine failure. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Subaru will notify owners by mail and instruct you to take your vehicle to a dealer to replace the PCV valve. Additionally, the replaced PCV valve will be inspected. If the valve is found to have separated, the separator cover and oil pan will be removed. If the separated parts are not located, the engine short block assembly will be replaced.
