1 recall listed by Transport Canada for this model year

Seats and restraints

2017073 13 Feb 2017

On certain vehicles, the push nuts and/or the lifter link which adjusts the height of the driver seat could be of insufficient strength and could become broken or detach from the seat frame. If this occurs, the seat height and inclination position would change rapidly, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the condition of the driver's seat lifter link. If no cracks are detected, a reinforcement bracket will be added to the lifter links, and the number of push nuts will be increased to two per seat lifter link. If any cracks are detected, dealers will replace the entire seat adjuster unit with a modified part.

Listed for the model year, not checked against your VIN. Mazda confirms which apply.
