### 1 recall listed by Transport Canada for this model year

#### Fuel system

2025447 2 Sep 2025

Issue: On certain vehicles, an incorrect fuel level may be displayed on the instrument cluster. As a result, the driver may be unaware of how much fuel is in the tank, and the vehicle could run out of fuel and stall. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: To reduce the safety risk, Mazda advises that you should refuel before the fuel gauge reaches  $\frac{1}{4}$  level until the recall repairs have been completed. Mazda will notify owners by mail and advise you to take your vehicle to a dealer to update the body control module software.

Listed for the model year, not checked against your VIN. Mazda confirms which apply.

Check your VIN with Mazda Canada or call a Mazda dealer with your VIN.
