Steering

2015060 11 Feb 2015

On certain vehicles, the steering column upper bearing retainer may fail due to a manufacturing defect. If this occurs, the upper bearing may experience additional stress causing excessive play in the steering wheel. This could result in vehicle instability and increase the risk of injury and/or damage to property. Correction: Dealers will replace steering shaft on EX35/FX35/45 and replace steering column assembly on GT-R.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
