2 recalls listed by Transport Canada for this model year

Fuel system

2005376 29 Nov 2005

On certain vehicles, the fuel filler hose may crack from exposure to ozone. This could cause fuel leakage from the hose while refuelling and the Malfunction Indicator Light (MIL) to illuminate as a result of the onboard diagnostic system detecting a leak in the evaporative emission control system. Fuel leakage, in the presence of an ignition source, could result in a fire. Correction: Dealers will replace the fuel filler hose.

Engine

2003267 5 Nov 2003

On certain vehicles, the circuit board for the crank position sensor may have an improper solder joint. This could cause the Service Engine Soon warning light to come on, create a no start condition, cause reduced engine power, or cause the engine to stop running without warning during vehicle operation. Correction: Dealers will replace the crankshaft position sensor and both camshaft position sensors.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
