§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/qashqai/2021

3 recalls listed by Transport Canada for this model year

Accessories

2023078 17 Feb 2023

Issue: On vehicles equipped with a jackknife-type folding key, over time the key blade may not stay locked in the fully extended (open) position. If you drive the vehicle with the key in the partially folded position, you could bump the ignition key and turn the engine off. This can cause a sudden loss of engine power, power steering and power brakes. This could also cause the airbags not to deploy in a crash. Note: This recall only affects vehicles that have an "S" trim level. Safety Risk: Airbags that do not deploy in a crash could create an increased risk of injury. A loss of power brakes can cause a sudden increase in brake pedal force and lead to an increase in stopping distance. A loss of power steering assist can cause a sudden increase in steering effort. A sudden loss of engine power could also increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you not to attach any accessories to the key fob, and to ensure that the key is fully extended before driving. As an interim repair, a dealer will install a fastener in the key slot to prevent the key from folding. Once replacement parts are available, you will need to return to a dealership to have a spacer inserted into the slot of the key fob that will stop it from collapsing.

Seats and restraints

2021452 23 Jul 2021

Issue: On certain vehicles, the passenger seat belt assemblies may contain defective automatic locking retractors (ALR). As a result, the seat belts may not properly lock to secure a child seat. Safety Risk: A seat belt that is not properly locked could increase the risk of injury in a sudden stop or a crash. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the seat belts, and replace them, if necessary.

Structure

2021425 12 Jul 2021

Issue: On certain vehicles, the hinges for the rear liftgate may not have been manufactured correctly. As a result, the hinges could fail and separate in a rear crash. Safety risk: A liftgate that opens or separates in a crash could create an increased risk of injury. Corrective actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to replace the rear liftgate hinges.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same configuration, 45 live listings, as of 26 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 26 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
